

GOOD NEWS
BROADCASTING NETWORK

Are you looking for a major evangelistic project to invest in with an organization that has demonstrated a good track record and high impact results?

Please consider supporting our Phoenix FM Radio Station Project.

OBJECTIVE

Purchase a commercial full-power Phoenix FM radio station to cover over 4.9 million population with Seventh-day Adventist Christian programming 24 hours/day to introduce listeners to Jesus, learn the truths of His Word, and prepare for heaven. This station will be the largest Seventh-day Adventist evangelistic programming (teaching and talk format) FM radio station in the United States to date.

MIRACULOUS PURCHASE PRICE

The Holy Spirit is working in this deal! With the station valued at \$7,500,000, we are excited to be in contract to purchase this station for only \$1,500,000, one-fifth of its market value. The station owner is excited to make this station available to help us “share the Word of God” in an effective way over the airwaves. This is an absolute miracle of God.

Valued at \$7,500,000, we are purchasing this station for only \$1,500,000!

TOTAL PROJECT COST

In addition to the purchase of the station, there are many related costs that need to be covered by this project, resulting in the total cost of **\$2,073,000**. This includes startup operating costs, additional staffing for support and programming, engineering and legal costs, and necessary equipment upgrades.

COVERAGE

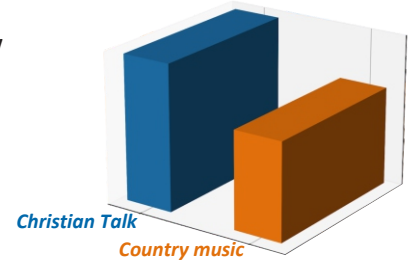

This station covers the entire Phoenix-metro area with a great signal, plus surrounding communities up to 120 miles away, as well as hours of highway commuting time in each direction through much of Arizona. Since the station covers about half of the land space of Arizona, hours of major highway commuting miles, and 2/3 of the population, it could be characterized as an ARIZONA STATION rather than a Phoenix station.

OVER =>

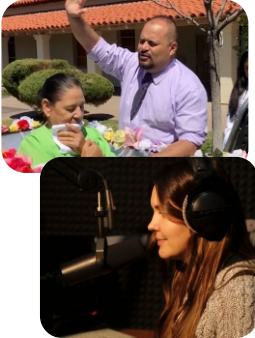

STATISTICS

According to Nielsen Ratings, this radio station currently has a listenership of over 459,000 every week. Additionally, Christian programming has now surpassed Country Music as the 4th most popular genre of radio programming in America. Furthermore, mass media is the most effective means of soul winning for those 18 years old and over. Finally, of all mass media, radio is the most trusted source and the most consumed daily throughout the US: 88% radio listeners; 86% television viewers; and 81% social media consumers.

listenership over 459,000

50% increase in baptisms

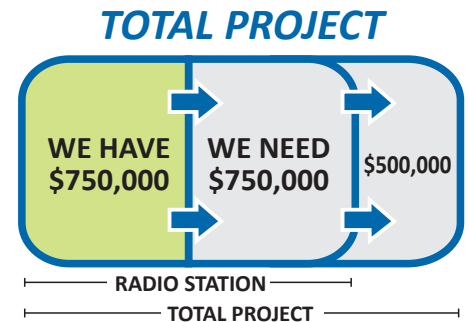

As a result of broadcasting throughout Arizona for 17 years (now also in 5 other states), a minimum of one third (33%) of the new-believer baptisms and Professions-of-Faith have been Good News TV viewers over a 5 year period, with greater percentages in some communities. This translates into 50% - 100% or greater increase in new-believers joining our churches. Since Good News TV viewers have constant access to Seventh-day Adventist teachings through our broadcasts, they are much more likely to mature into faithful contributing members. Other Adventist radio broadcasters have reported similar results, so we fully expect the same results for radio as we have experienced with television.

RESULTS

FUNDRAISING

We have raised \$750,000 for this project so far, which is about 1/2 of what we need for the radio station purchase slightly more than 1/3 of what we need for the total project. We are praying that God continue to help us raise the remainder of the \$1,500,000 radio station purchase at close of escrow September, 2026. We are also praying to successfully raise the balance of this \$2,073,000 by the end of 2026 to accomplish the key project objectives.

\$50-

\$500-

\$50,000-

Please keep this project and our ministry in your prayers, and please prayerfully consider partnering with us through a gift of any amount. This ministry is only possible with God's blessings and your support. We are committed to stewarding every dollar with care to impact lives for heaven.

OTHER PROJECTS

While this Arizona FM radio project is our largest current undertaking, it is not our only focus. We are also leveraging two rare 2026 FCC filing windows to pursue nine television station permits and up to ten radio translator permits.
